Information about 1383 projects active in calendar year 1969 was compiled from respondents to a questionnaire. The compilation has three main parts. (1) ~~I.~~ The project listing for United States projects are arranged alphabetically by States, and for foreign projects they are arranged alphabetically by country. Within each geographic location, the listing is further alphabetized by performing organization. Each entry also includes the project title, name of the investigator and address, the sponsor, and the type of support. The entries are numbered sequentially with "project numbers". ~~II~~ (2) The categorical listing or subject index, is arranged alphabetically by 19 subject categories. Within each category, the listing is further alphabetized by project title. Following each project title, its project number appears. ~~III~~ (3) The principal investigator listing or index is arranged alphabetically. Following each investigator's name, the project number and citations of publications and presentations resulting from the project appear.

GUIDE TO RESEARCH IN AIR POLLUTION

SECTION 1. INTRODUCTION

This Seventh Edition of the Guide to Research in Air Pollution was compiled by the Center for Air Environment Studies of The Pennsylvania State University for the National Air Pollution Control Administration. Covered in this document are projects that were active in Calendar Year 1969.

This Guide is divided into three parts:

1. A project list in which each domestic project is listed by state and each foreign project is listed by country.
2. A listing by subject.
3. A listing by name of the principal investigator.

Section 2 consists of the number assigned to the project, location and name of the performing research organization, project title, name of investigator and address, sponsor, and type of support.

Section 3 is a listing of projects by subject category and project number.

Section 4 contains the name of the principal investigator (when available), the project number, and titles of publications and presentations resulting from the project.

Because information contained herein was collected by means of questionnaire, neither The Pennsylvania State University nor the National Air Pollution Control Administration can assume any responsibility for validity or accuracy of information provided by the respondents.
